

## **Senior Java Software Development Contractor**

**Revinetix, Inc.**

**Reports to: Chief Scientist**

**Location: Salt Lake City, UT**

### **Position Summary:**

Revinetix, Inc. is seeking for a talented Java Software Development Contractor to assist in a three month contract to integrate our existing commercial data backup and recovery solution with VMWare Servers and VMWare Virtual Machines. With your passion for excellence and seamless end-user experience, you will be using Java development tools and languages for the completion and polish of this existing web services project.

### **Qualifications**

- Experience with and passion for Java and Java Development Tools.
- At least 5 years of professional software development experience.
- Strong attention to detail, ability to think clearly, creatively and independently. Must be intelligent, proactive, a problem solver with strong analytic skills, able to work independently, learn quickly and be self-motivated.
- Excellent command of the English language and interpersonal skills for both written and verbal communication.
- Experience with Object Oriented Design and UML.
- Practical knowledge of Software Development Lifecycles.
- Ability to function in an agile development environment.
- Practical knowledge of Unit Testing methodologies and infrastructures.
- Experience with and command of software version control systems.
- Experience and passion for end-user usability.
- Bachelor's degree in Computer Science or equivalent.
- Demonstrated record of team work and responsibility.
- Understanding and familiarity with Linux and Java platform and tools.

### **Work Environment and Physical Demand:**

General office environment; minor lifting of computer equipment may be required.
